Letter from J.C. Molony Esq., I.C.S., Collector of Bellary No. Ref. C. 2234/20-A-3, dated 7th February 1922:-

VLC

Reference- Board's Proceedings Mis.No. 228/2-2-20.-

-

The abandonment of the Kudatani tank was sanctioned by the Board in its proceedings referred to above and the - question of the disposal of the tank bed lands under B.S.O. No. 16 (1) was then taken up, after the wet lands in the tank

P 43 .3520 VOL I

ayacut were all transferred to dry.

A mahajar petition was received in the meanwhile requesting the reservation of the tank for communal purposes (i.e.) for water supply for men and cattle in the village. Though the tank is no good as an irrigation source the villagers want it maintained as a drinking source, as in this district provision of water for men and cattle is a difficulty. The Divisional Officer Bellary supports the mahazar. The Taluk Board Bellary is willing to maintain the tank if it is made over to it. As this proposal amounts to a departure from the provisions of B.S.O. No. 16(1), I request the Board's orders for making over the tank to the Taluk Board for maintenance.

I

Copies of the Divisional Officer's report and the Taluk Board resolution are enclosed for reference.

Copy of letter D Dis. 920 dated 3-10-21 from the Revenue Divisional Officer, Bellary-

With reference to your Ref. C. No.2234/21-A-3 dated 4-9-21, I have the honour to report that the tank has now received 2 months supply of water and it will take at least 3 months for the tank bed to get dry and the question of sub dividing the tank bed has to be deferred for at least 3 months, if in the meantime no supply is received.

2. The Revenue Inspector, Bellary reports that the villagers in a body object to the disposal of the tank bed for cultivation. They assert that if no water is allowed to stagnate in the tank, the supply in the wells will fail. What the villagers say, seems to be true as the Revenue Inspector reports that the wells in the villages are now receiving increased supply, while there was no supply in the wells, when the tank was empty. They also say that the supply in the tank will be useful for village cattle. The Tahsildar supports the Revenue Inspector's recommendation and requests that the tank bed may be retained as it is. The tank is situated about 1½ furlongs from the village site and as the whole village is against its being assigned for cultivation, I recommend its retention as poramboke for communal purposes.

Proceedings of the Taluk Board, Bellary

Dated 28th December 1921.

Read letter C.R.2234 dated 29-10-21 from the Collector of Bellary requesting to inform if the Board is willing to maintain the abandoned tank at Kudatini if it is made over to it.

President's note after personal inspection.

Resolution No.7-

Taluk.

The Board is willing to take and maintain.

III

Letter from J.C. Molony Esq., I.C.S., Collector of Bellary, No. C 2234-A-3 dated 24th April 1922.-

Your C/H No.236 /22-1 dated 17-2-1922.

The entire registered extent of ac. 87-38 forms the waterspread of the Kuddatini tank. It is reported that the waterspread extends even to certain adjoining patta lands when the tank is full.

Reference-

Submitted to Government.

2. The Board supports the Collector's proposal.

3. The abandonment of the tank was sanctioned in B.P. Mis. No.228 dated 2nd February 1920 as the Collector repre -

M7-8 CP

represented

(1) that the tank would retain no supply on account of the porous nature of the bund;

(ii) that no wet crops had been raised under the tank since Fasli 1321;

(iii) that the cost of putting the tank in repair was estimated at Rs. 3000 which was more than 33 times the actual revenue under the tank;

(iv) that the tank bed was silted up to a depth of more than 5 ft. and

(v) that the Executive Engineer doubted whether any water could be retained in the tank even if the bund was made water-tight

The tank bed measures 87.38 acs.

4. If Government approve the proposal to hand over the tank to the Taluk Board, the Collector will be requested to report at the end o three years whether the tank retains any water and is of any use to the villagers.

K. S. Vinod Ambatkar
Assistant Secretary.

3/6/22

Copy of Board's Proceedings No.228 Miscellaneous dated the 2nd February 1920.

I Read the following papers:--

Letter from J.I.Smith Esquire.,I.C.S.,Collector of Bellary, Reference G.C.No.4252 dated the 12th November 1919.

I have the honour to request that the Board may be pleased to sanction the abandonment of the Kudatini tank in Kudatini village, Bellary taluk, under the following circumstances. The tank is a minor irrigation work with a registered wet ayacut of 43 acres, 41 cents. Though the tank is a 6 months tank it is said to retain no supply on account of the porous nature of the bund. Since Fasli 1321 no wet crops have been raised under the tank. The Executive Engineer, Bellary, estimates the cost of putting the tank in repair at Rs.3000 which is more than 33 times the actual revenue under the tank. The tank bed is said to be silted up to a depth of more than 5 feet and the Executive Engineer doubts if any water will be retained in the tank even if the bund is made water tight. I agree with him and accordingly recommend that the ayacut may be transferred to dry and the tank bed lands disposed of according to rules.

Board's Reference thereon No.G1.5911/19-1 dated 21-11-1919.

II

The Collector is requested to ascertain and report whether in the event of the abandonment of the tank and the sale of its bed, the holders of the lands forming its present registered ayacut are likely to consent to the alteration of the classification of the ayacut from wet to dry.

III

Letter from A.F.G.Moscardi Esquire.,I.C.S.,Collector of Bellary Reference G.C.No.4252 dated the 21st January 1920.

In reply to Board's Reference No.G1.5911/19-1, dated 21st November 1919, I have the honour to state that the holders of the lands forming the registered ayacut of Kudatini Tank, have no objection to the transfer of the ayacut lands to Dry.

RESOLUTION

The Board sanctions the proposal of the Collector of Bellary to abandon the Kudatini tank in the village of Kudatini Bellary taluk and to transfer its ayacut to dry.

To U.S

A draft order approving the Boards' proposal is put up. It may be sent to L.S.G. for acceptance before issue

Govt. are not legally bound to maintain an irrigation work but if it is possible where they can interfere with irrigation rights of ryots without payment of compensation. Even if the tank is transferred to Local Board the ryots' rights to claim the water to irrigation – do not cease. Whether when the ryots were transferred they had any opportunity. Please call for a copy of Bpp No 228 dt 2.2.20 by which the correspondence was closed. See OM. issue
